Try. Before you buy.

Xserve and Mac Evaluation Programs

Why try the Mac?

Easy to secure.

Built on a proven, fully certified UNIX foundation, Mac OS X offers rock-solid security capabilities that help make it easier for your organization to comply with industry requirements.

Easy to manage.

With robust tools for centralized management of users, groups, and computers, Mac OS X enables IT staff to proactively support Mac systems throughout the organization while minimizing costs and effort.

Easy to integrate.

Your existing team can support the Mac on a heterogeneous network, using current business processes and tools, and a plug-in built into Mac OS X for Active Directory integration.

But don't just take our word for it. See for yourself.

**Contact your Apple
Authorized Reseller to
request your evaluation
systems today.**

Test drive the Xserve and/or up to five Mac systems in your own environment, risk free.

More options. No risk.

There's no better way to experience the power and reliability of Apple solutions than in your own environment. And now you can evaluate whether a system is a good fit—before you even decide to buy.

The Xserve and Mac Evaluation Programs enable you to make the most informed purchasing decisions, with hands-on experience using an Xserve and up to five Mac systems, while fully deployed in your organization's environment. To help get the most out of your evaluation, your Apple Authorized Reseller can assist with the entire process, from installation through configuration. And AppleCare can be included with your evaluation, so your organization can also sample Apple's excellent service and support.

We're confident in Apple solutions, so you can be too.

Whether your organization is already running an all-Mac environment, or simply considering Mac integration onto a heterogeneous network, you'll get the full experience of deploying a new Apple solution, with none of the risk.

We anticipate that your Xserve or Mac evaluation will exceed expectations. However, if by the end of your evaluation your organization decides not to purchase the evaluation solution(s), simply notify your Apple Authorized Reseller to set up a return.

▶ **Contact your participating Apple Authorized Reseller to get full details, terms and conditions for the Xserve Evaluation and Mac Evaluation Programs. Only U.S. corporations are eligible for these programs.**

Give it a try.

- No risk, up to 60-day evaluation
- Buy or return trial systems
